ÖN SÖZ

Değişen eğitim - öğretim sisteminde matematik programı

Bilimsel bilginin gelişimi, doğası, günlük hayatı yansımaları, sosyal ve ekonomik yönden katkıları gibi birçok alanı birleştirerek öğrencilerin donanımlı, bilişçi ve matematik dersini severek öğrenmelerini amaçlamıştır.

Eğitim sistemimizin hedefleri arasında, eleştirel, analitik, yenilikçi düşünen, sorgulayan, yorum yapan yanı üst düzey bilişsel becerilere sahip bireyler yetiştirmesi bulunmaktadır. Bu nedenle kitabımız hazırlanırken öğrenciyi birçok yönden desteklemek ve öğrenmeye kolaylaştırmak için gerekli yöntemler dikkate alınmıştır.

Ünite içeriği, konuların zorluğu ve kolaylığı, üniversite sınavında soru gelme olasılığı, test sayılarını belirlemeye ölçümüz olmuştur.

Soru içeriği, MEB Talim ve Terbiye Kurulu Başkanlığı'nın belirlediği kazanımlar esas alınarak oluşturulmuştur.

Kitabımızın sizlere yeterli verimi sağlama dileğinde...

PREFACE

Mathematics program in the changing education system

By combining many fields such as the development of scientific knowledge, nature, reflections in daily life, social and economic contributions, it aims to enable students to learn equipped, conscious by loving mathematics.

The objectives of our education system are to train individuals who think critically, analytically, innovatively think, question and interpret, that is, high level cognitive skills.

Therefore, while preparing our book, the necessary methods are taken into consideration in order to support the student in many ways and to facilitate learning.

The content of the unit, the difficulty and ease of the subjects, the likelihood of questions coming from the university exam have been measured in determining the number of tests.

The content of the question is based on the achievements determined by the MEB The Head Council of Education and Morality.

Wishing our book will provide you with sufficient efficiency...

$$Q = \left\{ \frac{a}{b} : a, b \in \mathbb{Z}, b \neq 0 \right\}$$

Rasyonel Sayılarda İşlemler *Operations with Fractions*

Toplama - Çıkarma *Addition - Subtraction*

$$\frac{a}{b} \mp \frac{c}{d} = \frac{a \cdot d}{b \cdot d} \mp \frac{c \cdot b}{b \cdot d} = \frac{a \cdot d \mp b \cdot c}{b \cdot d}$$

Çarpma *Multiplication*

$$\frac{a}{b} \cdot \frac{c}{d} = \frac{a \cdot c}{b \cdot d}$$

Bölme *(Division)*

$$\frac{a}{b} : \frac{c}{d} = \frac{a}{b} \cdot \frac{d}{c} = \frac{a \cdot d}{b \cdot c}$$

Rasyonel Sayılarda Sıralama *(Sorting Rational Numbers)*

✓ Verilen rasyonel sayılar uygun sayılarla genişletilerek pay veya paydası eşitlenir.

Paydaları eşit ise payı en büyük olan büyütür.

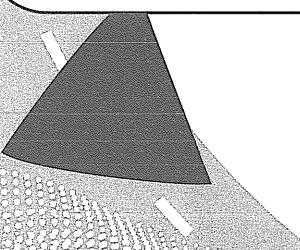

Payları eşit ise paydası en küçük olan en büyütür.

The numerator or the denominators is made equal by expanding the given rational numbers with suitable numbers.

If the denominators are equal, the number with the biggest numerator is bigger.

If the numerators are equal, the number with the smallest denominator is bigger.

$$\bullet \frac{1}{7} < \frac{4}{7} < \frac{5}{7} \quad \bullet \frac{4}{11} < \frac{4}{13} < \frac{4}{17}$$

Devirli Ondalıklı Sayının Rasyonel Sayıya Dönüşürlmesi *(Changing of Repeating Periodical Decimal Number to Rational Number)*

Sayıının tamamı – Devretmeyen kısım

Virgülden sonra devreden rakam sayısı kadar 9, devretmeyen rakam sayısı kadar 0 yazılır.

$$\bullet 0, \overline{176} = \frac{176 - 1}{990}$$

The whole of the number – Non-repeating part

After the decimal point as many nines as the number of repeating digits and as many zeros as the number of non-repeating digits are written.

Ondalıklı Sayılar *(Decimal Numbers)*

✓ Paydası 10'un pozitif sayı kuvveti olar rasyonel sayılarla ondalıklı sayı denir.

Decimal numbers are another way of writing fractions and mixed numbers.

$$\frac{7}{10^n} = 0, \underbrace{0000...}_n \quad \frac{3}{100} = 0,03$$

Devirli Ondalık Sayılar *(Repeating Periodical Decimals)*

✓ Bir rasyonel sayı ondalıklı biçiminde yazıldığında sayının ondalıklı kısmında rakamlar belli bir kurala göre tekrar ediyorsa bu sayıya devirli ondalıklı sayı denir ve tekrarlanan kısmın üzeri çizilir.

Every rational number either as a terminating or as a repeating periodically decimal is written in the form of a decimal number and the repeated decimals by the drawing a line segment over the digits which are repeated.

$$0, \overline{213} = 0,2131313\dots$$

Tam Sayılı Kesir *Mixed Number*

✓ $a \geq b > 0$ olmak üzere $\frac{a}{b}$ bileşik kesir denir.

let $a \geq b > 0$ compound fraction $\frac{a}{b}$
